x.com/hi_kukreja · Bengaluru, India

Engineering lead who owns product **end to end**: product research, UI design, frontend, backend and infra. Founding engineer twice. Builds **agentic AI products**, **real-time device streaming over WebRTC** and **developer tools**; open-sources the tools and teaches system design to backend engineers.

EXPERIENCE

Senior Software Engineer & Engineering Lead · Senseloaf AI
Apr 2026 – Present · Bengaluru

- Lead engineering of an **agentic hiring platform** used by enterprises and startups, with AI agents for sourcing, resume-to-job matching, profile verification, prescreening and AI interviews.
- Own features end to end: product research, UI design, frontend, backend and infra scaling.
- Building **SIA (Senseloaf Intelligent Agent)**, a chat interface where a recruiter runs hiring end to end, and its **MCP server**.

Software Engineer (Freelance) · pCloudy
Mar 2026 – Jun 2026 · Remote

- Device-streaming research for a **5,000+** device cloud; built mobile app testing solutions.

Founding Engineer · NativeBridge
Jan 2025 – Mar 2026 · Bengaluru

- Built cloud **Android and iOS devices streamed to the browser over WebRTC** at **<100 ms**, with touch, rotation, clipboard and file transfer.
- Open-sourced **iOS Bridge** (**75★**, iOS simulators from any OS) and **BridgeLink** (remote Android over secure tunnels).

Founding Engineer #1 · AutoFlow
Jan 2024 – Dec 2024 · Bengaluru

- Employee #1: built the backend from an empty repo in **FastAPI** on PostgreSQL, plus a **Bun WebSocket gateway**.
- Shipped AI-driven **autonomous UI testing** on a fleet of **Playwright runners** across AWS and GCP; launched on Product Hunt as **Product of the Day**.

SDA → SDE 1 · Ikarus 3D
Jan 2023 – Oct 2023 · Chandigarh

- Led the backend for **IkarusNest**: **7+** microservices (auth, carts, orders, slicer), JWT service auth, caching.
- Moved the slicer from AWS ECS/EFS to **GCP Cloud Run** (**−90%** infra cost); cut API latency **−50%** and login time **−30%**.
- Set up the company's first CI/CD pipelines; mentored 3 interns.

BUILDING & TEACHING

Markdrop · Founder, personal venture · markdrop.in
Mar 2026 – Present

- Publish markdown and AI docs with no account, or upload HTML, PDFs, sheets, Word docs, video and zipped sites: **one link that renders in any browser**.
- Web app, **VS Code extension** and a **CLI on Homebrew and Scoop**; TypeScript, designed and built solo.

System Design Mastery · free course · himanshukukreja.in/learn

- Free course for backend engineers with **1,000+** quick-check questions, plus long-form **engineering case files**.

Open source · github.com/himanshkukreja

- **iOS Bridge** (75★) · **BridgeLink** · **waygate** (self-hosted tunnel, Go) · **obscura** (encrypted HLS from S3) · **ios-web-streamer**

SKILLS

BACKEND	Python, FastAPI, Go, Bun, microservices, PostgreSQL, MySQL, Redis
REALTIME	WebRTC, Android and iOS device control, secure tunnels, HLS video
AI & AGENTS	LLM agents, MCP, Playwright automation, TensorFlow
CLOUD & INFRA	AWS (ECS, EFS), GCP Cloud Run, Docker, CI/CD
PRODUCT & UI	TypeScript, React, Next.js, UI design, CLIs and VS Code extensions

EDUCATION

B.E. Computer Science · Thapar Institute of Engineering & Technology
2019 – 2023 · CGPA **9.04**/10
